focusing sight

COMPARE THESE FEATURES!

Custom Built. Each instrument individually adjusted and checked for extreme accuracy.

Made of metal with weighted base. Highest quality powerful magnifier and components.

Can be focused on any area of the projected image from corner to corner, not just in the center.

No stooping — use at comfortable reading distance. Convenient to use even if enlarger is elevated to full height.

Dark negatives appear lighter and more transparent. Easier to obtain finished detail and critical sharpness.

Saves spotting! Help locate unwanted dust and lint on negative before printing.

Eliminates uncertainty. Positive focusing effortlessly.

Produces brilliantly sharp enlargements!

optics.

Made of metal with weighted
base.

The "Rangefinder" of your
enlarger.

Focus right with Magna-Sight!

BESTWELL OPTICAL INSTRUMENT CORP.

PROPER CARE OF YOUR MAGNA SIGHT

Your Magna Sight is a precision instrument and should be treated as such. Avoid dropping, bumping, rough handling etc.

In cleaning, use commercially available lens tissues and lens cleaning fluid. Wipe the lens very gently with a piece of damp lens tissue. Wipe dry with a piece of dry tissue wiping very gently again.

Sometimes during assembly, minute metal chips remain in the hollow of the base. Should you hear a slight rattle, please disregard this as it will not affect it's use.

C Magna-Sight Focusing Magnifier

This "image focusing" sight can be focused on any area of the projected image from corner to corner, not just in the center. Individually adjusted for precise and accurate focus. Made of metal with weighted base.

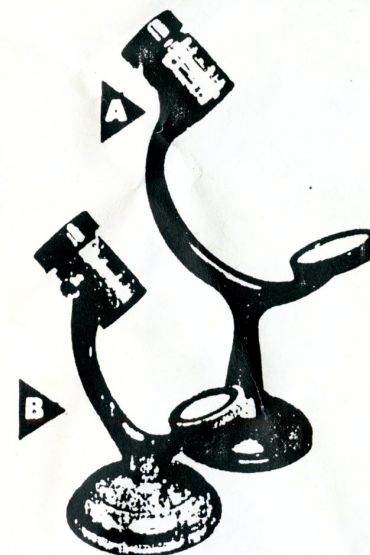

A Micro-Sight Focusing Magnifier

25X enlarger grain focusing scope features a bright triple element achromatic lens and "Mikodot Superbrite" mirror for sharp, clear reflection, free from "ghost" or double images. Adjustable eyepiece with air suspended hair reticle. Sturdy construction with weighted base.

B Mini Sight Grain Focuser

This 10X grain focuser is only a mere 5 1/2" high and features quality all-metal construction plus a front surface "Mikodot" mirror for a crystal clear reflection. This Mini Sight Grain Focuser is ideal for the student or anyone who's a beginner in photography.

D Bestwell 8X Maxiloupe

Offers true color rendering, high resolution and contrast. View 35mm and roll film slides, negatives or contact prints by reflected light. Can be adjusted to users' eyesight. 3" x 2 1/2" diameter.

BestWell Maxi Loupe has full 35mm frame coverage.
